

Best lagerapp4eva

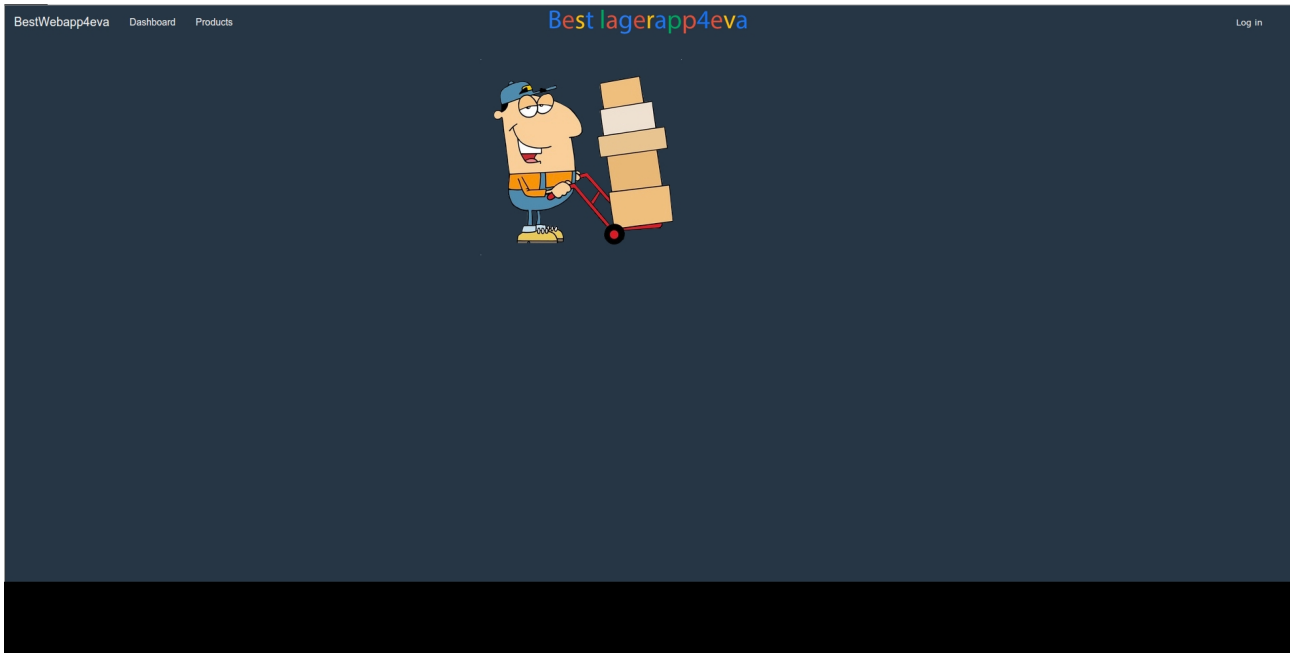

User guide

Welcome to Bestlagerapp4eva, the ultimate warehousing app!

This guide will help you understand what you can do with Bestlagerapp4eva and how you do it.

When you start Bestlagerapp4eva you'll be greeted with this screen:

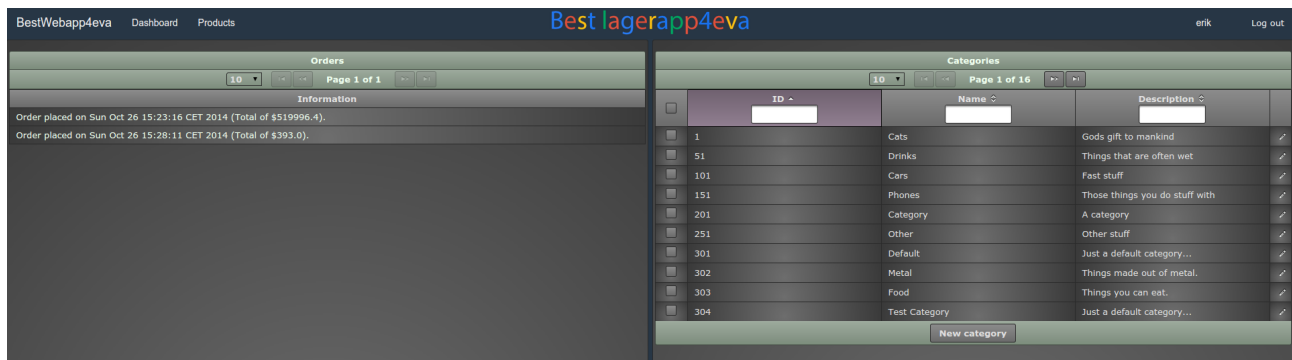

You need to create an account in order to use Bestlagerapp4eva. Do this by clicking "Log in" in the top-right corner. Then click "Create" in the new window.

A screenshot of a 'Create a new user' form. The form has a green header with the title 'Create a new user'. Below the header, there are three input fields: 'Username:', 'Password:', and 'Check if admin:'. The 'Check if admin:' field has a small square checkbox next to it. At the bottom of the form is a 'Create' button. The form is set against a dark grey background.

Bestlagerapp4eva will not use your account information for anything suspicious.

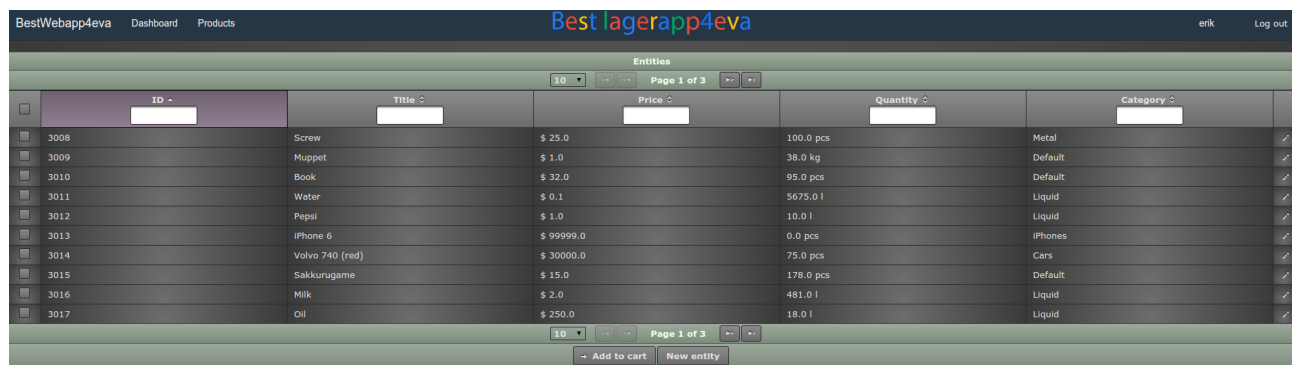

By creating a user for Bestlagerapp4eva you agree to our terms of service and that our view of "anything suspicious" might differ from that of yours.

When you've created your user you'll automatically login and be redirected to the main page, your dashboard.

The dashboard is where you can manage your own categories, such as the examples in the picture above, and view your previous orders.

To get started on managing your warehouse, head over to the “Products” page in the top-left corner!

Here's all the stuff that's in your warehouse. You can edit the entries by clicking the small pen icon to the leftmost at each row.

In the bottom you see two buttons, the right one lets you create new things to manage for your warehouse.

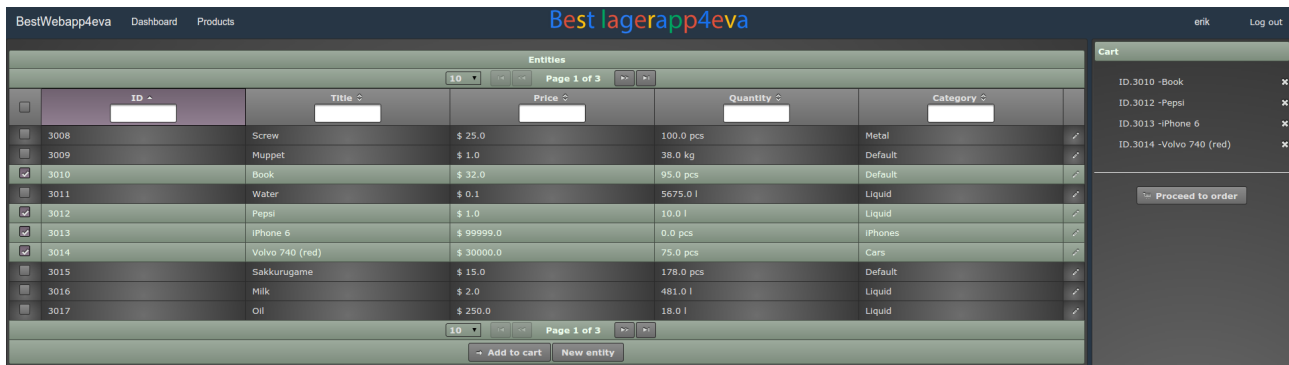

There's also some customization options for how you want to view your warehouse. Try them out!

We've added some really useful filtering/search tools for you as well, in order for you to maximize your warehousing. You can:

- Sort entries by ID, Title, Price, Quantity or even Category
- Search for specific IDs, Titles, Prices, Quantities or Categories
- For numeral attributes (price and quantity) you can type “<x” to list all entries where their corresponding values are less than x! This works for “>” and “=” as well.
- Select multiple rows at the same time, just click the checkbox to the rightmost to select one entry.

Once you've selected the entries you want to manage, click the “Add to cart” button to add them to your cart.

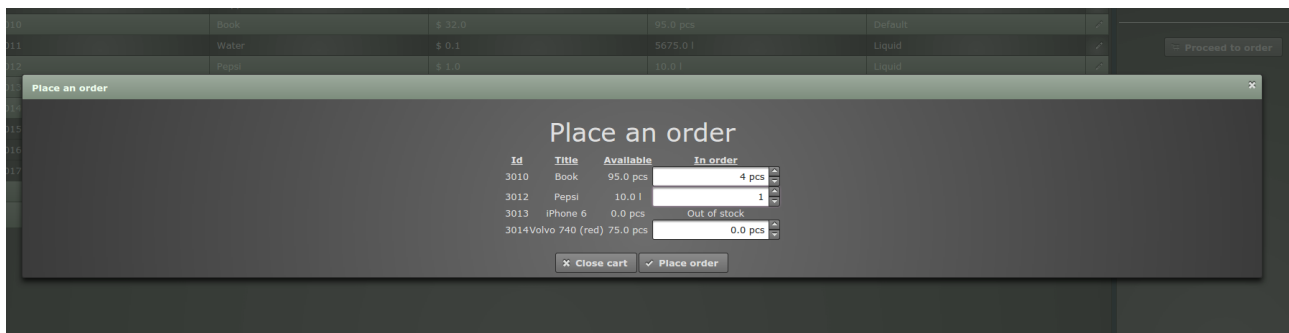

Here we've added some entries to the cart. You can remove an entry from the cart anytime you want by clicking the small “x” next to the entry in the cart.

The screenshot shows the 'Bestlagerapp4eva' interface. On the left, there's a table of items with columns for ID, Title, Price, Quantity, and Category. The table is paginated, showing 'Page 1 of 3'. On the right, there's a 'Cart' section with a list of items added to the cart, each with a small 'x' icon for removal. At the bottom of the cart, there's a 'Proceed to order' button.

ID	Title	Price	Quantity	Category
3008	Screw	\$ 25.0	100.0 pcs	Metal
3009	Muppet	\$ 1.0	38.0 kg	Default
3010	Book	\$ 32.0	95.0 pcs	Default
3011	Water	\$ 0.1	5675.0 l	Liquid
3012	Pepsi	\$ 1.0	10.0 l	Liquid
3013	iPhone 6	\$ 99999.0	0.0 pcs	IPhones
3014	Volvo 740 (red)	\$ 30000.0	75.0 pcs	Cars
3015	Sakkurugame	\$ 15.0	178.0 pcs	Default
3016	Milk	\$ 2.0	481.0 l	Liquid
3017	Oil	\$ 250.0	18.0 l	Liquid

Once you are happy with your cart, click the “Proceed to order” button to really manage your warehouse!

The screenshot shows a 'Place an order' dialog box. It contains a table with columns for Id, Title, Available, and In order. The table lists items from the cart, showing the available quantity and the quantity entered in the 'In order' field. The 'In order' field has a spinner control. At the bottom of the dialog, there are buttons for 'Close cart' and 'Place order'.

Id	Title	Available	In order
3010	Book	95.0 pcs	4 pcs
3012	Pepsi	10.0 l	1 l
3013	iPhone 6	0.0 pcs	Out of stock
3014	Volvo 740 (red)	75.0 pcs	0.0 pcs

Unfortunately, you're out of iPhones and can't order any from your warehouse. But that's good! It would be terrible if you could order something that doesn't exist, which would probably put you in debt. The team over at Bestlagerapp4eva knows this and cares about your warehouse, so we made sure that can't happen.

You can only order as much as you have available for each entry, which is also a truly amazing feature made possible by Bestlagerapp4eva.

If you want to add stuff to your cart, feel free to close the cart and keep adding entries from the product page. Bestlagerapp4eva will remember what's already in your cart.

When you're happy with your order, press “Place order” to get a confirmation of your order and the option to save it as a PDF.

That about covers the most fundamental parts of what makes the best warehousing app we've ever created so far. We really hope you'll enjoy using Bestlagerapp4eva!

- The Bestlagerapp4eva team
